Feedback Ag Transport

The result

Transport company gets increased fuel mileage and extended drain intervals using Schaeffer's #700 Supreme 7000 motor oil and #267 Supreme Gear Lube.

The Company

Ag Transport of Winterville, Georgia

The Story

Tim Brannon is the owner of Ag Transport in Winterville, Georgia and has twelve over-the-road trucks. All are Peterbuilt 359's, set up with Cummings BC4 400's Cpl676 and backed with Fuller RTO 14613-14609B. Tim had been using Dryden oil, 15W-40 in all of his trucks before switching to Schaeffer over ten years ago.

When he tried Schaeffer's Supreme 7000 15W-40 motor oil and #267 Supreme Gear Lube, he experienced a 10% increase in fuel mileage. Also, based on Schaeffer's oil analysis his oil change intervals went from 10,000 miles to 12,000, then to 15,000. Currently one of Tim's trucks is at a 45,000 mile change interval, and the others are maintaining at 23,000 mile intervals.

Ag Transport also uses Silver Streak for fifth wheel lube, Citrol for all cleaning purposes, Penetro 90 for disassembling, Moly Supreme #238 grease #2 for all applications, Clean and Cool for maintaining the water systems on Big Kam Cummings Diesel Tract 2000 and Neutra Fuel Stabilizer.
