It's the Cost to Use**

Bottom Line

THE BOTTOM LINE

Schaeffer's #221 Moly Ultra Extreme Pressure Grease extends mower bearing life by 4 times; and mowers cut more evenly on fairways and greens. Added bonus: Schaeffer's #221 Moly Ultra makes customer a hero to his boss!

THE COMPANY

Riverplace Country Club Austin, TX.

THE STORY

The head mechanic, Freddy, has been using Schaeffer's #221 Moly Ultra Extreme Pressure Grease on ten Toro golf course motors for about 2 ½ years.

Prior to switching to Schaeffer's, Freddy was replacing the cutting unit bearings quarterly; he simply thought they were wearing out that fast since they mowed the greens every morning.

After switching to Schaeffer's #221 Moly Ultra, Freddy only had to replace the mower cutting unit bearings once a year and that was because the seals were worn out. Freddy decided to replace all the cutting unit bearings on all of their mowers at the same time, but said that the bearings still looked good. Freddy went on to say that since the bearings are holding up so well, the greens and fairways are cut more evenly compared to the way the mowers cut before switching to Schaeffer's #221 Moly Ultra. Needless to say, the switch to Schaeffer's made Freddy a hero to his supervisor because of the time and money he saved the company.

The bottom line here is the time and money saved by eliminating the need to replace the bearings as often. Plus, since the fairways and greens are looking better because of fewer cutting unit bearing failures, Freddy says using #221 Moly Ultra has made his job much easier, leaving him more time to take care of other maintenance.

Riverplace Country Club also uses Schaeffer #137 ND Diesel Treat 2000 and #131 Neutra Fuel Stabilizer.
