It's the Cost to Use**

## **Bottom Line**

---

### **THE BOTTOM LINE**

Schaeffer's Moly Ultra Red grease reduces wear and cuts consumption in half at golf course.

### **THE COMPANY**

Bandit Golf Course – New Braunfels, Texas

### **THE STORY**

Bandit Golf Course had been using lithium type greases from several other companies before switching all of their maintenance equipment to Schaeffer's #229 Ultra Red about a year ago. According to Sam Friese, Maintenance Foreman, #229 holds up better in the early morning when they have watered the course or have heavy dew-grass cutting situations.

This course has about twenty pieces of equipment. They have reduced grease consumption by over 50% and reduced wear on the mowers since switching to the Schaeffer grease. This is the only grease in their maintenance shop, thereby reducing their inventory and eliminating the chance of mixing incompatible greases in their equipment. The Bandit Golf Course maintenance shop also uses: #700, #280, #266, #235, #137ND, #315, and #743.

Maintenance Foreman, Mr. Sam Friese at Bandit Golf Course
